

Doping Control Activities Report

2024

The 2024 TDP is due to the Risk Assessment mainly focused on IC Testing, because the risk of doping is in waterskiing higher during high level competitions, where athletes maybe try to compete even if they are slightly injured.

In 2024, the IWWF RTP consisted of 6 athletes who were each to be tested 3 times OOC (at least one of the tests per Person includes ESA + GHRF). The 6 RTP athletes were the same as 2023 due to organisational and financial Problems.

According to this this Report includes all Tests performed on IWWF RTP Athletes, all Test performed in competition at Competitions of the Major IWWF Level (World Championships) and at top regional level (European Champinoships, PanAm Championships, Asian Championships etc) and all positive cases concerning Athletes in all Sports under the responsibility of IWWF (even if the RMA was a NADO).
